

# VP DAYLIGHTING

## STYLE

### TRANSLUSCENT WALLITE

## FEATURES

THE ECONOMICAL CHOICE WHEN BUILDING  
PLANS CALL FOR WALL DAYLIGHTING OPTIONS

- Wallite panels are economical, tough and provide long service life.
- Wallite panels provide natural interior light.
- Easy to install
- Choose Panel Rib or Vee Rib wall profiles

**T**ranslucent Wallites provide natural diffused light for brighter working conditions with the potential to save energy and lighting costs. Wallites are available in Panel Rib and Vee Rib wall profiles.

# VP WALLITES ALLOW ECONOMICAL DAYLIGHTING OPTIONS FOR YOUR VP BUILDING

## TRANSLUCENT WALLITE PANELS

VP's Wallite panels are made of translucent GFRP (glass fiber reinforced polymer) which provide soft, diffused natural light for your building. They are more economical than windows because they are incorporated into the wall panels of the building and require little or no maintenance. Light transmission is 60%.

Panels are available in Panel Rib and Vee Rib wall systems profiles. Both roof and wall panels are available in fire retardant material. The fire retardant panels are UL 25 flame spread rated.

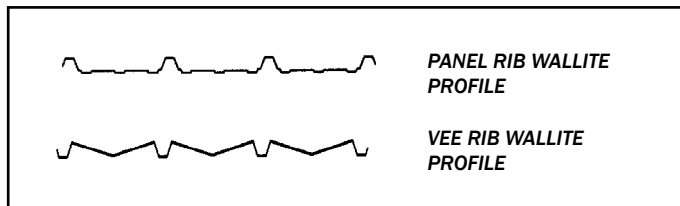

### DAYLIGHTING OPTIONS FOR WALL SYSTEMS

Panel Rib Wallite are white translucent GFRP panels manufactured in the Panel Rib profile for use in wall applications. These panels are available in standard lengths of 5'-3" as well as custom lengths.

Vee Rib Wallite are white translucent GFRP panels manufactured in the Vee Rib profile for use in wall applications. These panels are available in standard lengths of 5'-3" as well as custom lengths.

### DAYLIGHTING OPTIONS FOR ROOF SYSTEMS

See VP Tuf-Lites for roof panel skylights. Ask for product sheet #2081.

## FEATURES

- Natural lighting saves energy
- Class 1 fire rated available (UL 25)
- ICC-ES legacy reports Panel Rib and Vee Rib ER-5048
- 60% light transmission
- Corrosion, chemical and weather resistant
- Matches roof and wall panel profiles
- Exceeds ASTM D 3841
